Product Data Sheet

Product Number: 758ST7573

Model: Heel Grounder, Hook & Loop, ESD-Safe, Non-Marking, Three Layer Rubber, Blue

Description:

Non-marking stretch Hook and Loop heel grounders help keep your controlled environment clean and your personnel grounded. The 758st7573 is constructed from a non-marking and highly dissipative three layer rubber. The reversible 1.5inch wide rubber cup, secures both at the back and underneath the heel. Its 7.5inch length rubber provides enough cup volume to fit comfortably on those with larger shoe sizes. The 7inch stretch hook and loop enclosure ensures a comfort fit. These heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Picture:

Scope: This specification defines the technical requirements for heel grounders under the brand Techni-Pro. If not otherwise specified, the grounding snap should meet or exceed the requirements of ANSI ESD-S20.20 and ESDA Standard 1.1-2006

Applications:

Heel grounders provide a path-to-ground for operators that must be mobile. Operators should wear two heel grounders, one for each foot and be used in conjunction with an anti-static floor or mat.

Closure Type	Stretch Hook & Loop
Non Marring	Yes
Resistor	Yes –1meg
Fastener	Hook & Loop
Reusable	Yes
Material	Two Layer Rubber
Color	Gray/Blue
